

UNIPAS

COMPANY PRESENTATION

Experts of foldable IBC containers,
Gitterboxes, and Steel Pallets.

www.unipas.com

ABOUT US

For over three decades, we have leveraged our expertise to deliver durable, safe, and efficient products. We specialize in manufacturing steel logistics storage solutions, including steel pallets, IBC containers, and gitterboxes.

With a dedicated R&D team, we offer development services to help businesses create custom-designed steel products. Our capabilities include laser cutting, flow drilling, welding, bending, and more.

We adhere to international standards ISO 9001 and ISO 14001, ensuring efficient quality management and environmental protection across our entire production process.

Our Services

LASER CUTTING

Laser cutting provides detailed and very precise division of metal materials made of stainless steel, steel and aluminium.

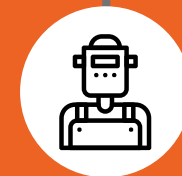

ROBOTIC WELDING

Robot ABB IRB 1600 ensures smooth weld seams and high quality of final work pieces. Precise, detailed and faultless.

CNC EDGE BENDING

The fastest press brake in the given class. TruBend 5130 has an excellent performance, accurate results and perfect angles.

LASER WELDING

Laser is a detailed and precise tool with all types of welds. Detailed accuracy, high speed and smooth, solid welds.

LASER CUTTING

Laser cutting provides detailed and very precise division of metal materials made of stainless steel, steel, and aluminium. This technology allows for clean and accurate cuts, which are essential for high-quality manufacturing.

We can create detailed designs with **various thicknesses of metal sheets, offering great flexibility for diverse projects.**

Whether it's intricate shapes or large-scale production, laser cutting ensures precision and consistency across all applications.

**Let Us Handle Your
Most Complex
Specifications**

TRUMPF

Our Machines

2D cutting with **TRUMPF TRULASER**

3030 3.2 KW

3D tube laser cutting **TRULASER TUBE**

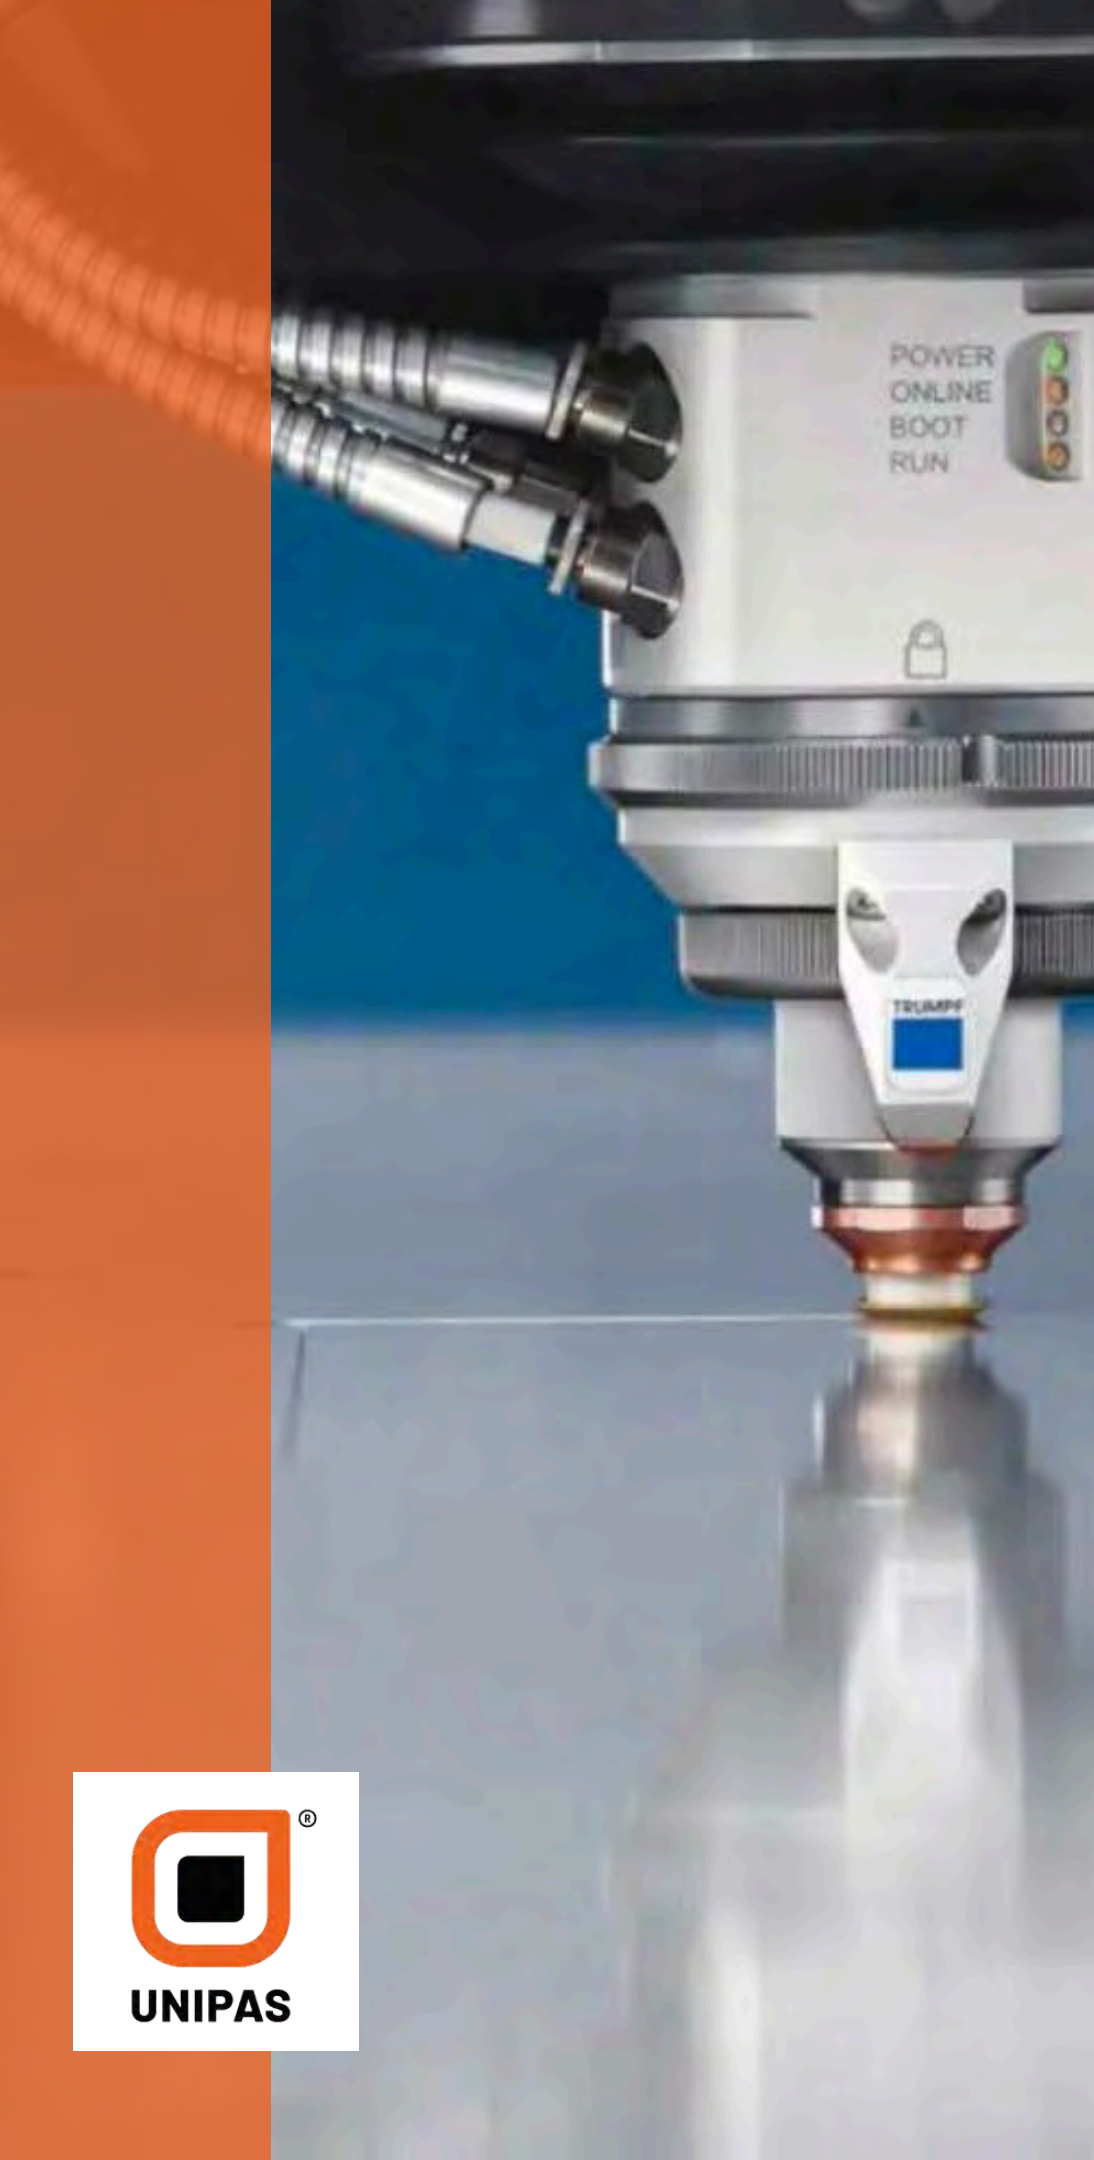

7000 4 KW

We Can Produce the Following Products:

- ✔ Automotive industry parts
- ✔ Agricultural machinery tools
- ✔ Sidecar trailers
- ✔ Excavator components
- ✔ Various types of rails
- ✔ Transport containers

UNIPAS

UNIPAS SERVICES

ROBOTIC WELDING

WELDING WITH ROBOT ABB IRB 1600

Robot ABB IRB 1600 is a guarantee of quality, speed and accuracy. It is characterized by high performance and shorter timing of individual cycles.

OTC DAIHEN FD-B6L WELDING ROBOT

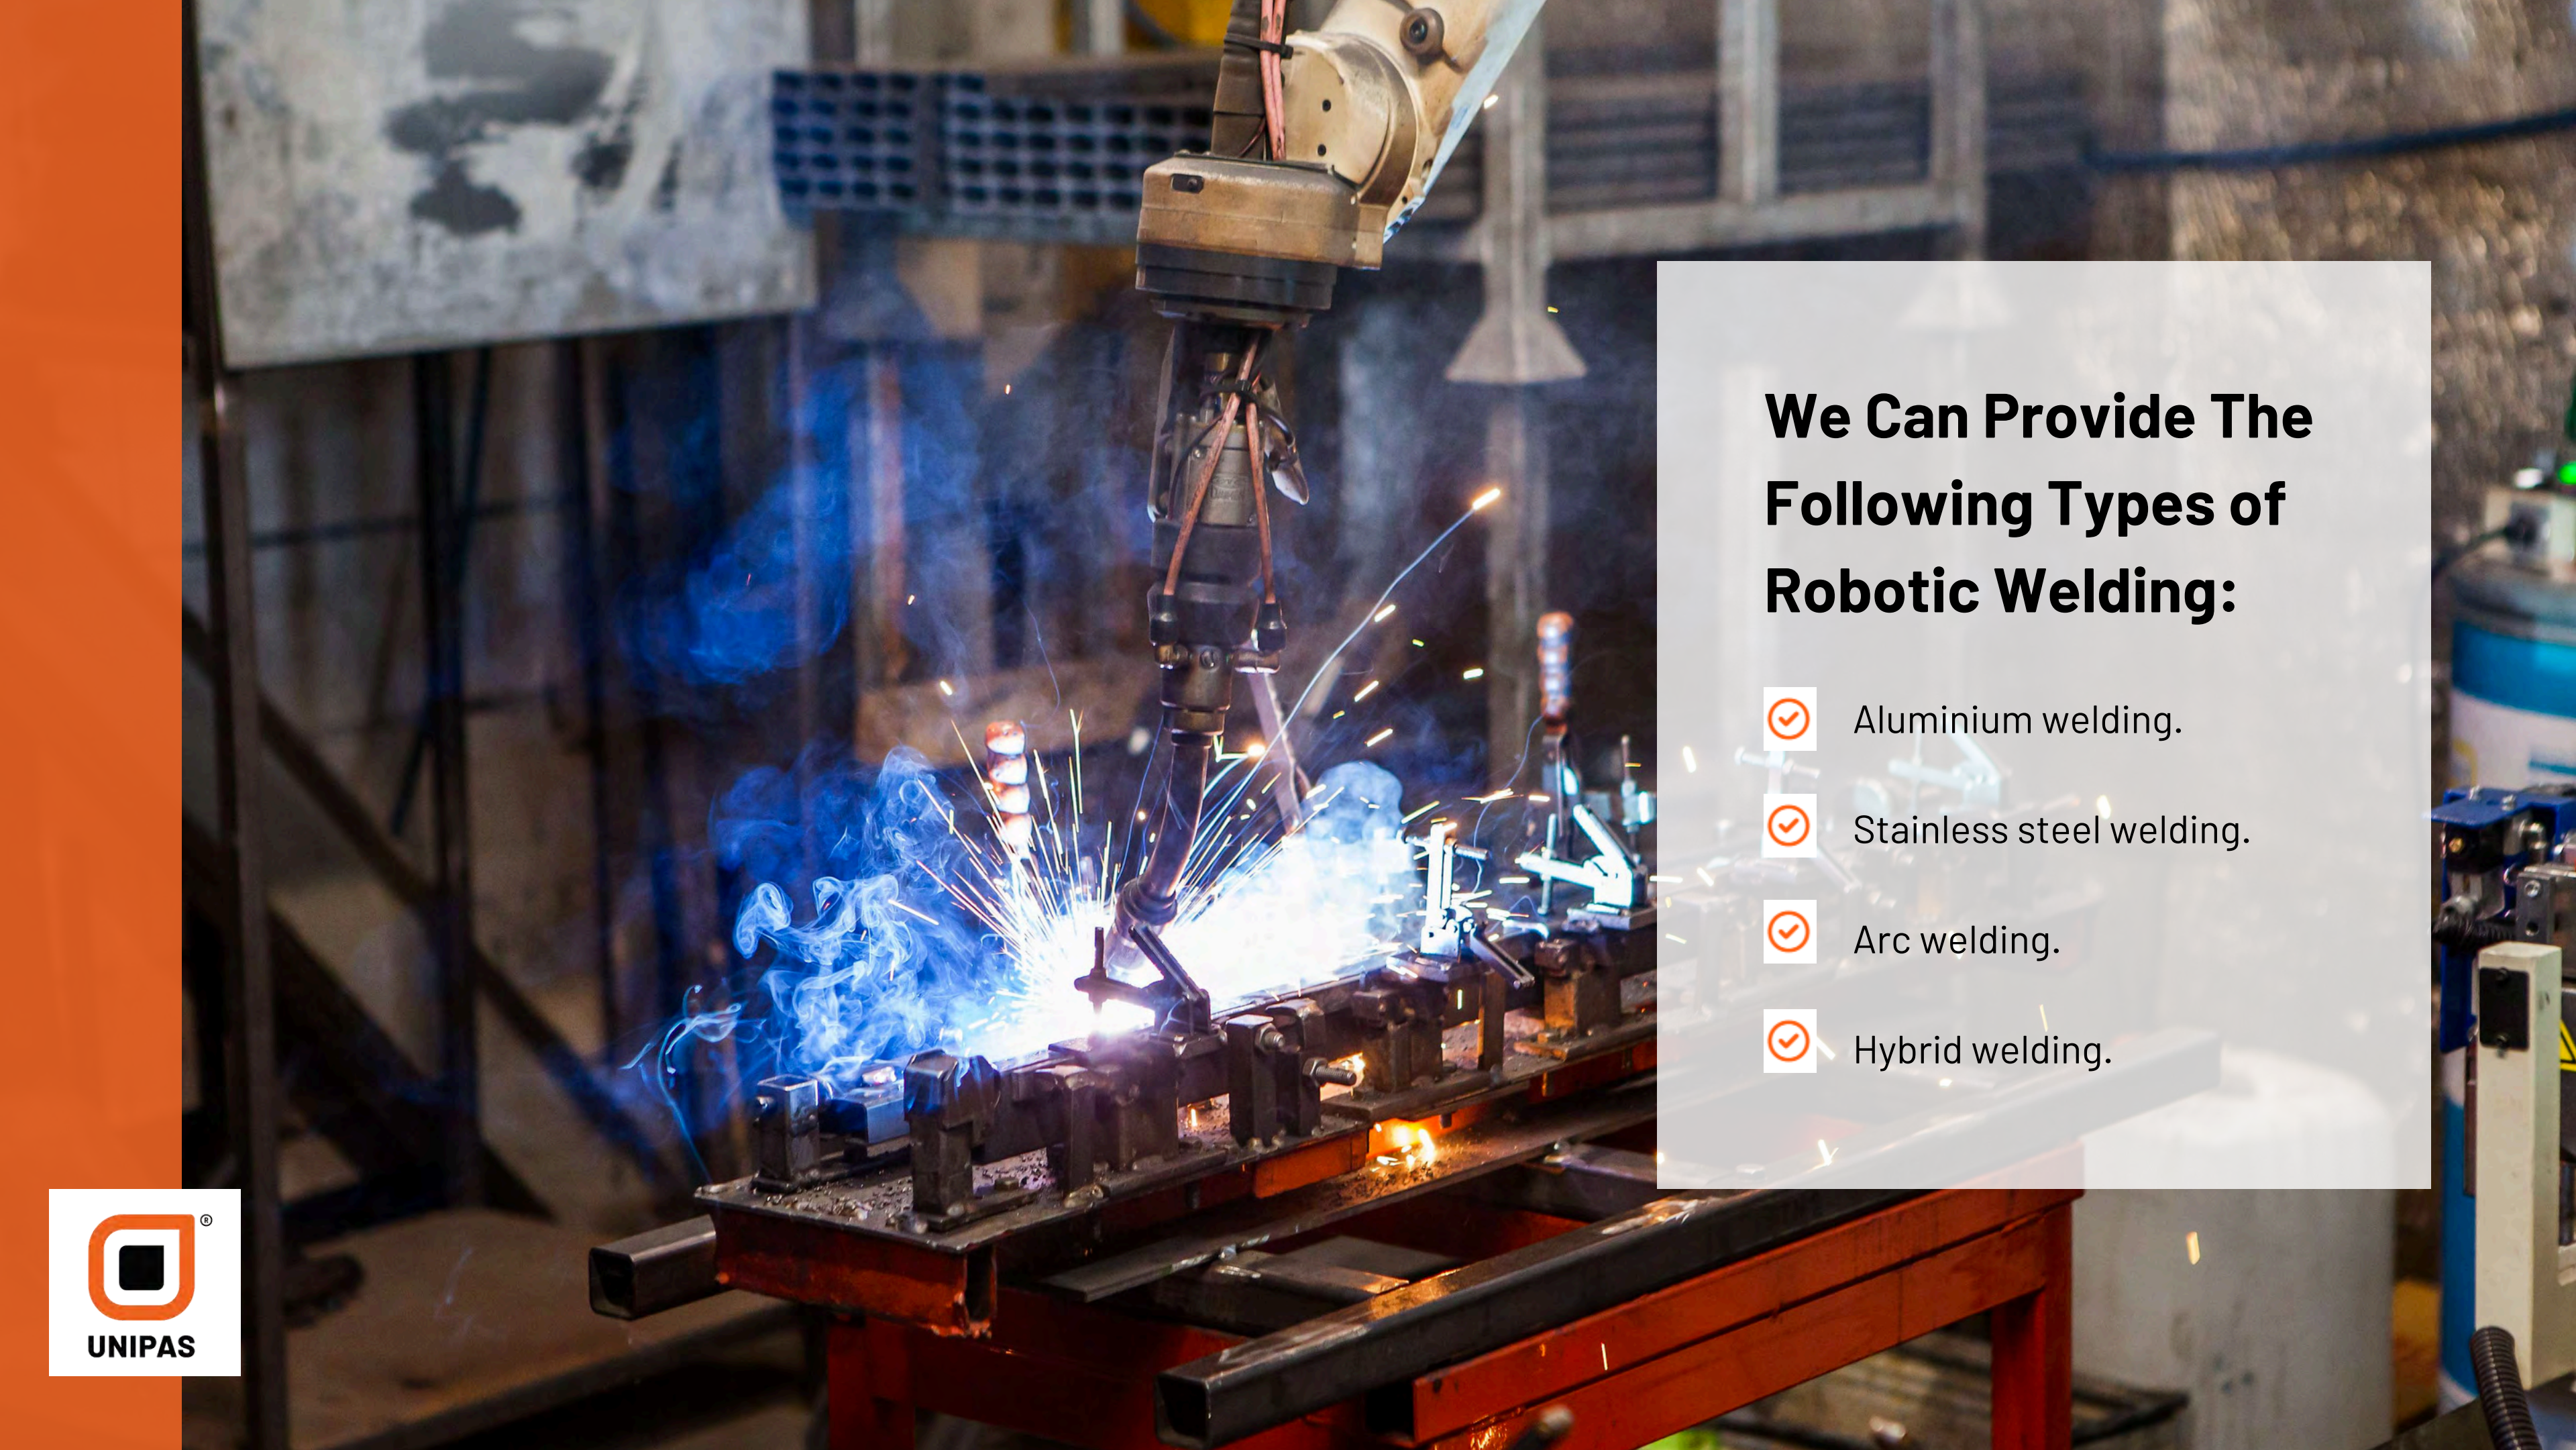

Key advantages: faster cycle time, slim design, **and more solid design**

A2PF501 two axis positioner- 500kg

The maximum rotation speed of the tilt axis has been increased 2.5 times.

**Precision Welding,
Powered by Our
Robotic Systems**

We Can Provide The Following Types of Robotic Welding:

- ✔ Aluminium welding.
- ✔ Stainless steel welding.
- ✔ Arc welding.
- ✔ Hybrid welding.

UNIPAS SERVICES

CNC EDGE BENDING

TruBend 5130

We work with the fastest press brake in the given class.

TruBend 5130 is a globally very successful **TRUMPF** edge-bending machine. From programming to setting tools and the edge bending itself - **it produces with unrivaled productivity.**

We Can Provide:

- Die shaping.
- Tilt shaping.
- Shaping of simple parts.
- Processing of complicated parts.

**Find The Most
Effective Solution**

RESEARCH AND DEVELOPMENT

**Effective
Processes Result in
High-Quality
Output**

The In-house Research and Development Department was established to obtain and improve common technological knowledge. We are **aimed at the production of prototypes, optimization of processes, and testing of new systems and designs.**

Provably higher speed
Wide scope of material variability
Considerably lower costs

After many years of dedicated effort, we have earned the esteemed respect of our partners and established a solid presence in the global market. Our products are highly competitive and fully compliant with international quality standards. We have evolved into a robust and prosperous company, forming equal partnerships with renowned organizations worldwide.

With over **170,000 products delivered** to our partners, we are delighted to continue nurturing successful and lasting collaborations.

WE ARE A STEADY AND STRONG

PARTNER FOR YOUR FUTURE

We offer the most demanding technologies in production.

90 % OF OUR PRODUCTS ARE

EXPORTED ABROAD

Our IBC containers go to international markets all over the world.

WE SATISFY HIGH

INTERNATIONAL STANDARDS

Results are high-quality products and innovative technologies.
